ABOUT ME

Full-stack developer building complete, production-style applications — real authentication, real databases, and real OpenAI-powered features — across React/Node.js and Python/FastAPI stacks. Focused on shipping working software rather than tutorials, and on integrating AI thoughtfully into actual product features rather than bolting it on.

SKILLS

Languages: Python, JavaScript, SQL

Frontend: React, Tailwind CSS, Framer Motion, HTML, CSS

Backend: Node.js, Express, FastAPI, REST APIs, JWT Authentication

AI Integration: OpenAI API, Prompt Engineering, AI-driven feature design

Databases: PostgreSQL, Prisma, SQLAlchemy, Alembic

Tools: Git, GitHub, Docker, Postman, VS Code, Netlify, Render

EXPERIENCE

Full-Stack / AI Project — *AI Reading Companion*

- Full-stack reading tracker with per-user private libraries and an admin-curated public collection.
- Built REST backend with FastAPI and PostgreSQL (Neon), using Alembic for schema migrations.
- Implemented JWT authentication via httpOnly cookies, replacing an earlier client-exposed token scheme.
- Integrated the OpenAI API to generate AI-powered book summaries and reading insights.

Full-Stack / AI Project — *NeoBank*

- Full-stack banking app for managing accounts, transfers, and deposits.
- Built backend with Node.js and Express; PostgreSQL via Prisma ORM.
- Implemented JWT authentication, transaction history, and account dashboards.
- Added an on-demand AI spending-insights feature using the OpenAI API to summarize monthly activity in plain language.

Full-Stack / AI Project — *Moodverse AI*

- Mood-based recommendation app suggesting movies, books, and music.
- Built backend with Node.js and Express, integrating TMDB, Google Books, and Deezer APIs.
- Replaced a hardcoded mood-mapping system with a real OpenAI (GPT-4o-mini) call that interprets free-text mood input into genre and search parameters.
- Built a responsive React/Tailwind frontend with mood-reactive color theming.

EDUCATION

Self-Taught Full-Stack Developer

Online Courses & Personal Projects

- Built multiple full-stack applications with Python and JavaScript.
- Focused on backend logic, frontend design, and real AI integration.
